Dear Agent/s,

In brief-
There is a organised crime syndicate operating rooted in the south australian goverment and department's

.
In part the mulligan commission exposed not only 86 prominent S.A people in positions of power who are without doubt paedophiles, it also exposed the S.A child welfare in trafficking children as sex slaves, these 2 facts is the reason a suppression order was placed on justice Mulligan's report and a second suppression order was placed on why the first suppression order was ordered. These people include former premiers and prime ministers.

This is only the start of a multi billion dollar a year business that also involves child sex tourism, red rooms, human meat for sale, organ trafficking and more.

In terms of the red rooms (a room or place where people bid with bit coin on the dark web to determine the form of a victims torture and murder), the victim's meat is sold in butcher's shops across Adelaide for consumption by people, the organs are harvested and transported at the time of discovery by RAAF aircraft out of the Adelaide base.

Due to the mulligan commission findings the operations have moved interstate for the most part. Child welfare in redcliff Queensland and Nimbin New South Wales (according to a source) are now part of this trafficking "pipeline", however it is national into every state and territory as well as international.

This crime syndicate is well know for tactics of blackmail, extortion, false imprisonments and murder, while it uses predominantly other paedophiles, the fact a human heart can fetch a million dollars or more on the black market means it can pay people very well to entice their participation.

The use of RAAF aircraft is due to facts like military aircraft run to schedule (needed for organ viability) are rarely stopped, delayed, rarely searched, etc...

I suggest all RAAF aircraft of all bases are randomly searched (day and night) just before take-off or upon arrival, to find the new pipeline of organ trafficking (do not overlook adelaide).

I wish I can be more precise however as stated the mulligan report stuffed me up by dispersing this nationally.

There is over 70 years of background intelligence of this crime syndicate operation which you may need, and I can answer most questions you have, I ask this be done by email as at times I can drown in the scope and mass of the information, and I do not communicate well with people...

The S.A parliament, premier and attorney General have emails in form of litigation which I will send upon request, the evidence I've collected over 20 years is a bit harder and will require a in person exchange.

Evidence has a bad habit of evaporating into thin air when exposed...

I hope you will look into everything by way of evidence and start checking everything listed in the litigation emails as it will lead you to everything else. Then follow the money and games rich people play...

Sincerely,
Peter Thompson.
