Dear Sir or Madam,

I am writing to submit a formal allegation of research misconduct under the University of Toronto's **Framework to Address Allegations of Research Misconduct**.

I assert that a 2024 paper in *Nature Materials*, authored by a team affiliated with the University of Toronto, plagiarised the central, original principle of my prior work and presented it without citation. I hold a timestamped manuscript from 2018 that clearly describes the **core physical mechanism** of layered/interface-driven high-temperature superconductivity. This evidence demonstrates that my work predates the 2024 publication by six years and was not cited, which I believe constitutes a serious breach of research integrity.

This matter was raised formally on May 30, 2026, with the journal *Nature Materials*, and the University's graduate admissions office (admissions.sgs@utoronto.ca) was copied on that correspondence, placing the University on formal notice.

I request a thorough investigation to verify my claim of priority and to review the conduct of the Toronto-based authors for potential failure to cite prior art. All available corroborating documentation, including my timestamped 2018 manuscript, is attached.

I am available to provide any further information required for the initial inquiry, as outlined in Section 5.2 of the Framework.

Thank you for your attention.

Yours sincerely,

Peter James Thompson
